ABOUT ME

I have recently graduated from the Interaction Design course at Northumbria University in Newcastle with a First-class with honours.

My speciality is in UX and UI design and I have extensive experience using all Adobe packages such as Photoshop, InDesign, Illustrator and video editing software such as After Effects and Premiere. Due to some of my recent projects, I am highly experienced and skilled in Unity. My final project for university involved working in VR and has grown me greatly as a designer. I am greatly skilled in prototyping software such as Sketch, Invision and Principle from my development throughout my time at university.

Something I like to do for fun is music production and creation using tools such as Ableton, Logic and Pro Tools where I have produced tracks where a few have millions of listens.

I am the representative for our entire course which involves communicating the needs of the needs of students in the course.

SKILLS

· Interaction Design · Product Design · UX Design

· UI Design · User Research/Testing · Virtual Reality/Augmented Reality

· Rapid Prototyping · Wireframes · Visual Design

· Usability Testing · Front End Development · Adobe Suite

· Invision/Sketch · Unity · Ableton/Logic/Pro Tools

EXPERIENCE

May 2017 – Hedgehog Labs
Work Experience/Design Sprint

I took place in a design sprint and began development on an app and is currently still in development which has a 5-, 10- and 20-year plan for future development.

September 2016 – May 2017 – GM Cruise
Investigations into Autonomous Vehicle

Looked into the potential concepts of a U-Car (Utility Car) and an X-Car (Experience) with a large amount of research and user testing.

September 2016 – May 2017 – Sage One
Payroll software and application
Helped generate ideas and concepts for a brief set for a university project with feedback from Sage.

EDUCATION

Northumbria University
Interaction Design - 2018
