emily wilkinson.

Interaction and digital designer

Hello, I'm Emily, a driven and determined designer. I would consider myself a very keen and quick learner who works very well under pressure. In my past 3 years at university I have developed strong UX and UI skills working on a variety of projects across a range of medias, I'm also extremely eager to undertake challenges that constantly strengthen my skills.

experience

DWP Government Live Project (Jan 18 - Mar 18)

In pairs, we were given strict design guidelines for a new government service to be featured on Gov.uk website. Designing a futuristic Enhanced Biometric Passport, we had to specify key user needs, conduct interviews and thorough user testing.

Hedgehog Labs Live Project (May 17)

Working through a design sprint process, in pairs, we designed and pitched ideas for a new application 'Youseum'. The concept being a social platform where users attach memories to objects. In this design sprint my skills to work well under pressure and at a quick pace became very useful.

Sage One Live Project (Nov 16 - Jan 17)

Aimed at a small business, my partner and I designed a 'new and improved' Sage One business management and payroll software. We developed visual concepts, prototyped, and pitched the final designs to the Sage One team.

Sales Associate @ Ted Baker (Sept 14 - Present)

As a sales associate I can identify customer needs and provide the best possible solution ensuring the customer always leaves happy. I have developed a variety of skills and responsibilities, including sustaining a leadership role of training new staff members and managing the floor when needed.

education

Northumbria University 2015-2018
